

FIXTURE MODIFICATION

CUSTOMIZE AND CREATE THE PERFECT FIXTURE

Decrease installation time and on-site hours by offloading some of those working hours to EiKO. We are happy to add cords, plugs, whips, battery backups, controls, photocells, surge protection, optics, and many other fixture modifications. All modifications are turned around in less than two weeks and take place either at our warehouse in the US or Canada.

All modifications are certified and approved. Reach out to your local contact for pricing.

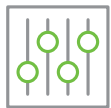

Refer to spec sheets for more details on fixture modification options. Just remember, even though the mod you are looking for may not be listed, just let us know what you need and we will do our best to make it happen.

Modifications to fixtures can increase functionality and it also plays a key role in productivity and energy management.

SIMPLY EiKO.

MODIFICATIONS

CONTROLS - Tailor lighting to space and application to enhance performance, capabilities, energy savings, and overall user experience

SENSORS - Control lighting with Photosensor/Photocell/Daylight, Motion and Occupancy, and Time controlled sensors

EMERGENCY BATTERY BACKUP - Provide continuous power to lighting fixtures during outages

WHIPS, CORDS AND/OR CORD ENDS - Alternative cord options and lengths for ease of installation

LENS CHANGE OUT - Replace the current fixture lens to support the application and end user needs, reducing costs at work site

SURGE PROTECTION - Protect the lighting investment from electrical surges

PHOTOCELL - Enable the “dusk-to-dawn” feature for safety, security and energy savings

OPTICS - Control the beam angle, create crisp-edged or diffused light, or focus light to a specific area
